Protecting Your People

Parking Zone Safety System

WORLD'S LIGHTEST, STRONGEST, & MOST DURABLE SPEED BUMPS AND PARKING BLOCKS

SPEED BUMPS

- Improve pedestrian and vehicle safety!
- Reduce traffic to a safe speed!
- Durable – Will last season after season
- Weather resistant - Never warp, chip, rot, or corrode
- Environmentally Friendly - Manufactured from 100% recycled material
- Modular - Unlimited design possibility
- Portable - Can be moved for snow removal or surface maintenance
- Low maintenance – Very little or no maintenance required
- Simple Installation - No heavy machinery required
- Affordable – Lightweight for economical shipping - Costs a portion of the cost of concrete
- Colorful – Highly visible day or night to both drivers and pedestrians

PARKING BLOCKS

- Keep vehicles from obstructing walkways and lawns!
- Stop Drivers from parking too close to buildings!

Applications:

- Residential Roads
- Parking Lots
- Shopping Centers
- Laneways
- Drive-Thru
- Commercial Indoor Garages
- Residential Indoor Garages
- Great Vehicle Stopper
- Hospitals

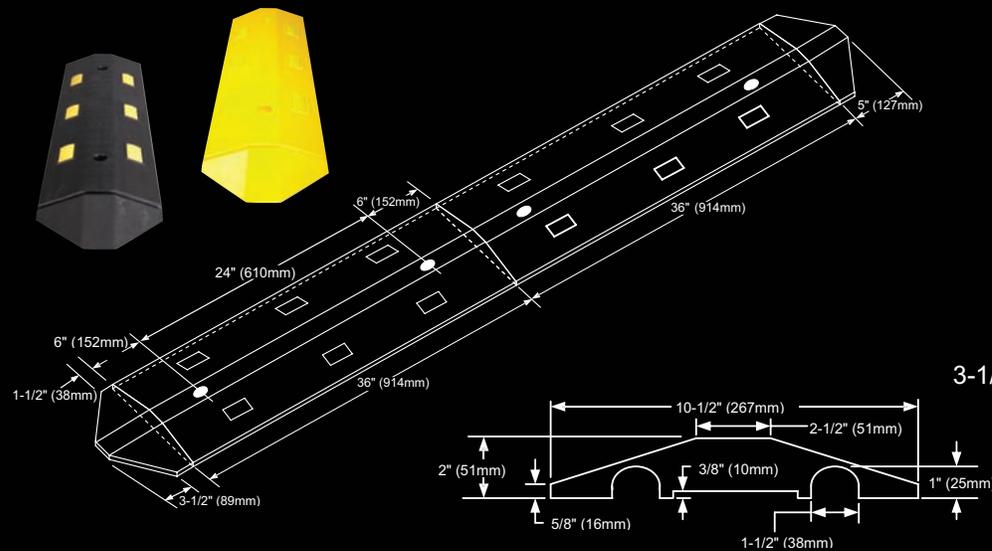

SPEED BUMPS AND PARKING BLOCKS

BUMP IT OR BLOCK IT...WE'VE GOT YOU COVERED!

SPEED BUMPS

Economic, Modular & Light Weight

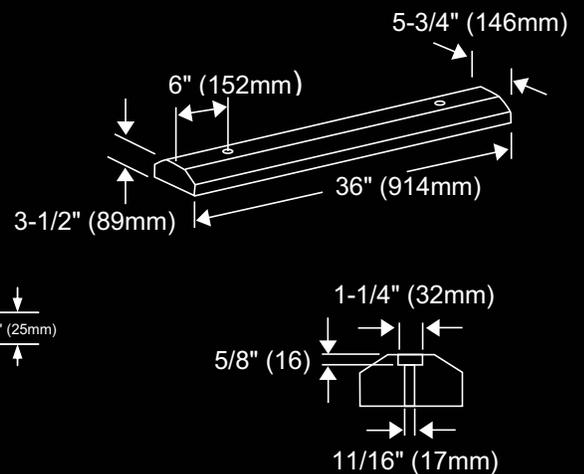

- Yellow Plates: Each speed bump section is embedded with (6) reflective yellow safety plates of weather resistant, composite material for protection from salt, freeze and thaw.
- End Cap: 5" (127mm) Safety Snap On End Cap - sloped modular profile prevents tripping by pedestrians.
- Can be used as a cable cover - bottom sides include 1" x 1½" (25 mm x 38 mm) channels for protecting temporary or permanent cables or hoses.
- Weighs only 10lbs (4.5kg)/piece. - Ships at a fraction of the cost of heavier speed bumps.
- Size: 36" long x 10.5" wide x 2" high-main piece (914mm long x 267mm wide x 51mm high)
- A standard speed bump system section includes (2) main pieces, (2) end caps x 5" long (127mm) and (1) connector clip. Main pieces may be added and connected to form larger units.
- Made of Recycled PVC.
- Its Flexibility allows it to contour to road crown.

PARKING BLOCKS

Simple, Affordable & Colorful

- Eliminate brittle concrete replacements with 100% recycled plastic parking blocks engineered to prevent warp, crack, chip and rot
- Unlimited design possibilities with modular design and multiple colors; safety yellow, grey or blue
- Lightweight 4lbs (1.8kg) per piece for economical shipment and simple, one-person installation without use of heavy machinery
- No painting needed—UV treated for ultimate durability and low-maintenance
- Modular connectors are supplied with any multiple piece order

Installation Styles

- Asphalt installations will be supplied (2) 12" (305 mm) long spikes
- Concrete installations are supplied (2) 8" (203mm) lag bolts with anchoring sleeve
